IN THE CLAIMS:

Please amend the claims as follows:

1.   **(Currently amended)**   A fence assembly for a tablesaw having a work surface, a cutting tool disposed on the work surface, said fence assembly comprising:

a fence beam having first and second opposite sides for being slideably disposed on the work surface;

a first plurality of studs projecting outwardly from said first side with each stud extending to a head spaced from said first side; [[and]]

an independent fence face having a first plurality of spaced keyhole shaped slots each having an enlarged end for removably receiving and a narrow end for retaining said heads of said studs to removably attach said fence face to said fence; and

a plurality of plates attached to said fence face with each of said plates presenting one of said keyhole shaped slots.

2.   **(Previously presented)**   An assembly as set forth in claim 1 including a second independent fence face disposed on the other side of said fence beam and having a second plurality of keyhole shaped slots, a second plurality of studs extending from the other side of said fence beam each to a head spaced from said second side.

3.   **(Previously presented)**   An assembly as set forth in claim 1 wherein said fence face extends above said sides of said fence beam.

4.   **(Original)**   An assembly as set forth in claim 1 wherein said fence face is metal.

5.   **(Original)**   An assembly as set forth in claim 1 wherein said fence face is plastic.

6.   **(Original)**   An assembly as set forth in claim 1 wherein said fence face is wood.
